

The Team Deatails

Project : **Fee Status Manager**

Group - 1

Mentor : Benumadhaba Rath

Team Leader Name : Asit Kumar Raut

Team Member 1: Akash Kumar Swain

Team Member 2 : Aditya Kumar Sahoo

Team Member 3 : Bishwa Prakash Rout

Project Overview

ABSTRACT:

- **The Core Objective:** A secure, automated desktop application designed to streamline student fee collection, tracking, and receipt generation, replacing manual, error-prone paperwork.
- **Technical Foundation:** Developed using **Python (Tkinter)** for a modern, responsive user interface and **MySQL** for a secure, relational database backend.
- **Role-Based Access:** Features a secure three-tier login system:
 - **Admin:** For system approvals, fee controls, and feedback monitoring.
 - **Counselor:** For searching students, entering payments (Online/Offline), and tracking collections.
 - **Student:** For viewing fee summaries, checking payment history, and generating receipts.
- **Key Innovation:** Incorporates real-time financial tracking, UTR transaction verification for online payments, and automated ledger balance calculations.

OCAC

INTRODUCTION & PROBLEM STATEMENT

Manual Challenge:

- Calculation Errors
- Lack of Transparency & Long Queues
- Difficult Revenue Tracking
- Data Security & Loss Risks

The Proposed Solution:

- Three-Tier Role-Based Access (RBAC)
- Automated Fee Logic
- Dual-Mode Payment Processing
- Real-Time Collection Reports
- Digital Receipt & Feedback Management

Technology stack here:

OCAC

Three-Tier User Architecture (Roles):

1. Admin (Superuser):

- Authorization
- Verification
- Monitor and control
- Review
- Rewrite

2. Counselor (Operator):

- Record maintenance
- Payment maintenance
- Filters and views

3. Student (End-User):

- Monitors real-time fee summary
- Views and exports payment history & receipt logs.
- Submits feedback/grievances to the admin.
